

 **doctor B**
BÜLENT CİHANTİMUR

Genital Beautification Course

This Course Will Consist of Presentation and Live Surgery With Doctor B.

The Live Surgery Will Be Conducted with the Team of Participating Doctors and they will watch and live practice the operation.

This new genital beautification technique covers labiaplasty, radio frequency, autologous stromal cell enriched fat transfer and laser application.

Since the changes appeared in vagina occur in several tissue types, a correct intervention must cover multiple techniques instead of using one single method. Vaginal beautification technique developed by Dr. Cihantimur stands forward among other techniques.

Although psychological reasons have been held accountable for sexuality related problems in females, current research suggests that women concerned about physical and cosmetic problems in the vaginal area are in the majority.
